Agent

# Cloud Connector Visibility Example

**Step 1**  
Deploy Policy Server  
in Genians Cloud

**Step 2**  
Enable Cloud Connector  
in Policy Server

**Step 3**  
Connector Collects Information  
About Instances in the Cloud

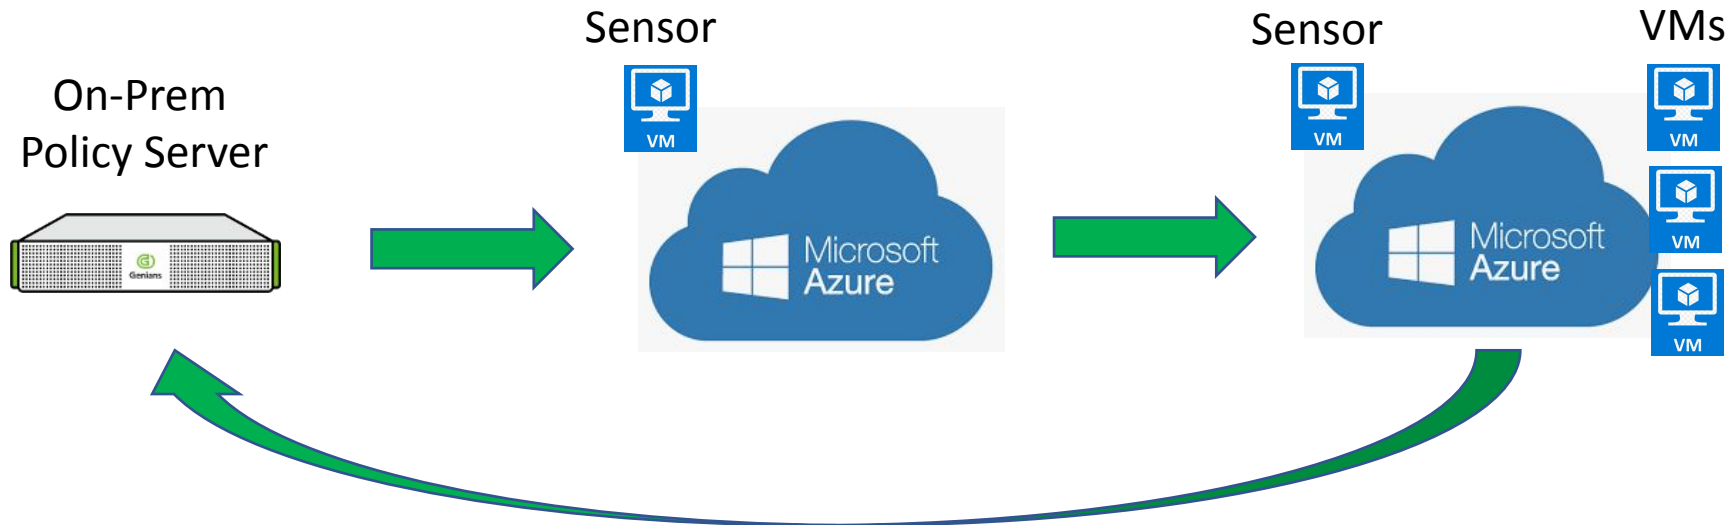

# Cloud Sensor Visibility Example

**Step 1**  
Deploy Policy Server  
On-Prem

**Step 2**  
Deploy Cloud Sensor  
in Azure

**Step 3**  
Cloud Sensor Detects  
all VMs In Azure Subnet

# Agent Visibility Example

**Step 1**  
Deploy Policy Server  
in AWS

**Step 2**  
Install Agent on Google  
Compute Instance

**Step 3**  
Agent Collects Information  
About Compute Instance

# Example Combined Node List in ZT-NAC UI

GCP VM  
with Agent

Azure VMs  
detected by Sensor

AWS EC2s detected  
with Connector

# Cloud Connector Control Example 1

**Step 1**  
Cloud Node Matches  
on Enforcement Policy

**Step 2**  
Cloud Connector Issues  
CLI Command

**Step 3**  
Instance is Shutdown

# Cloud Connector Control Example 2

**Step 1**  
Cloud Node Matches  
on Enforcement Policy

**Step 2**  
Cloud Connector Issues  
CLI Command

**Step 3**  
Instance Security Group  
Rules Modified to Restrict  
Access or Quarantine EC2

# Agent Control Example

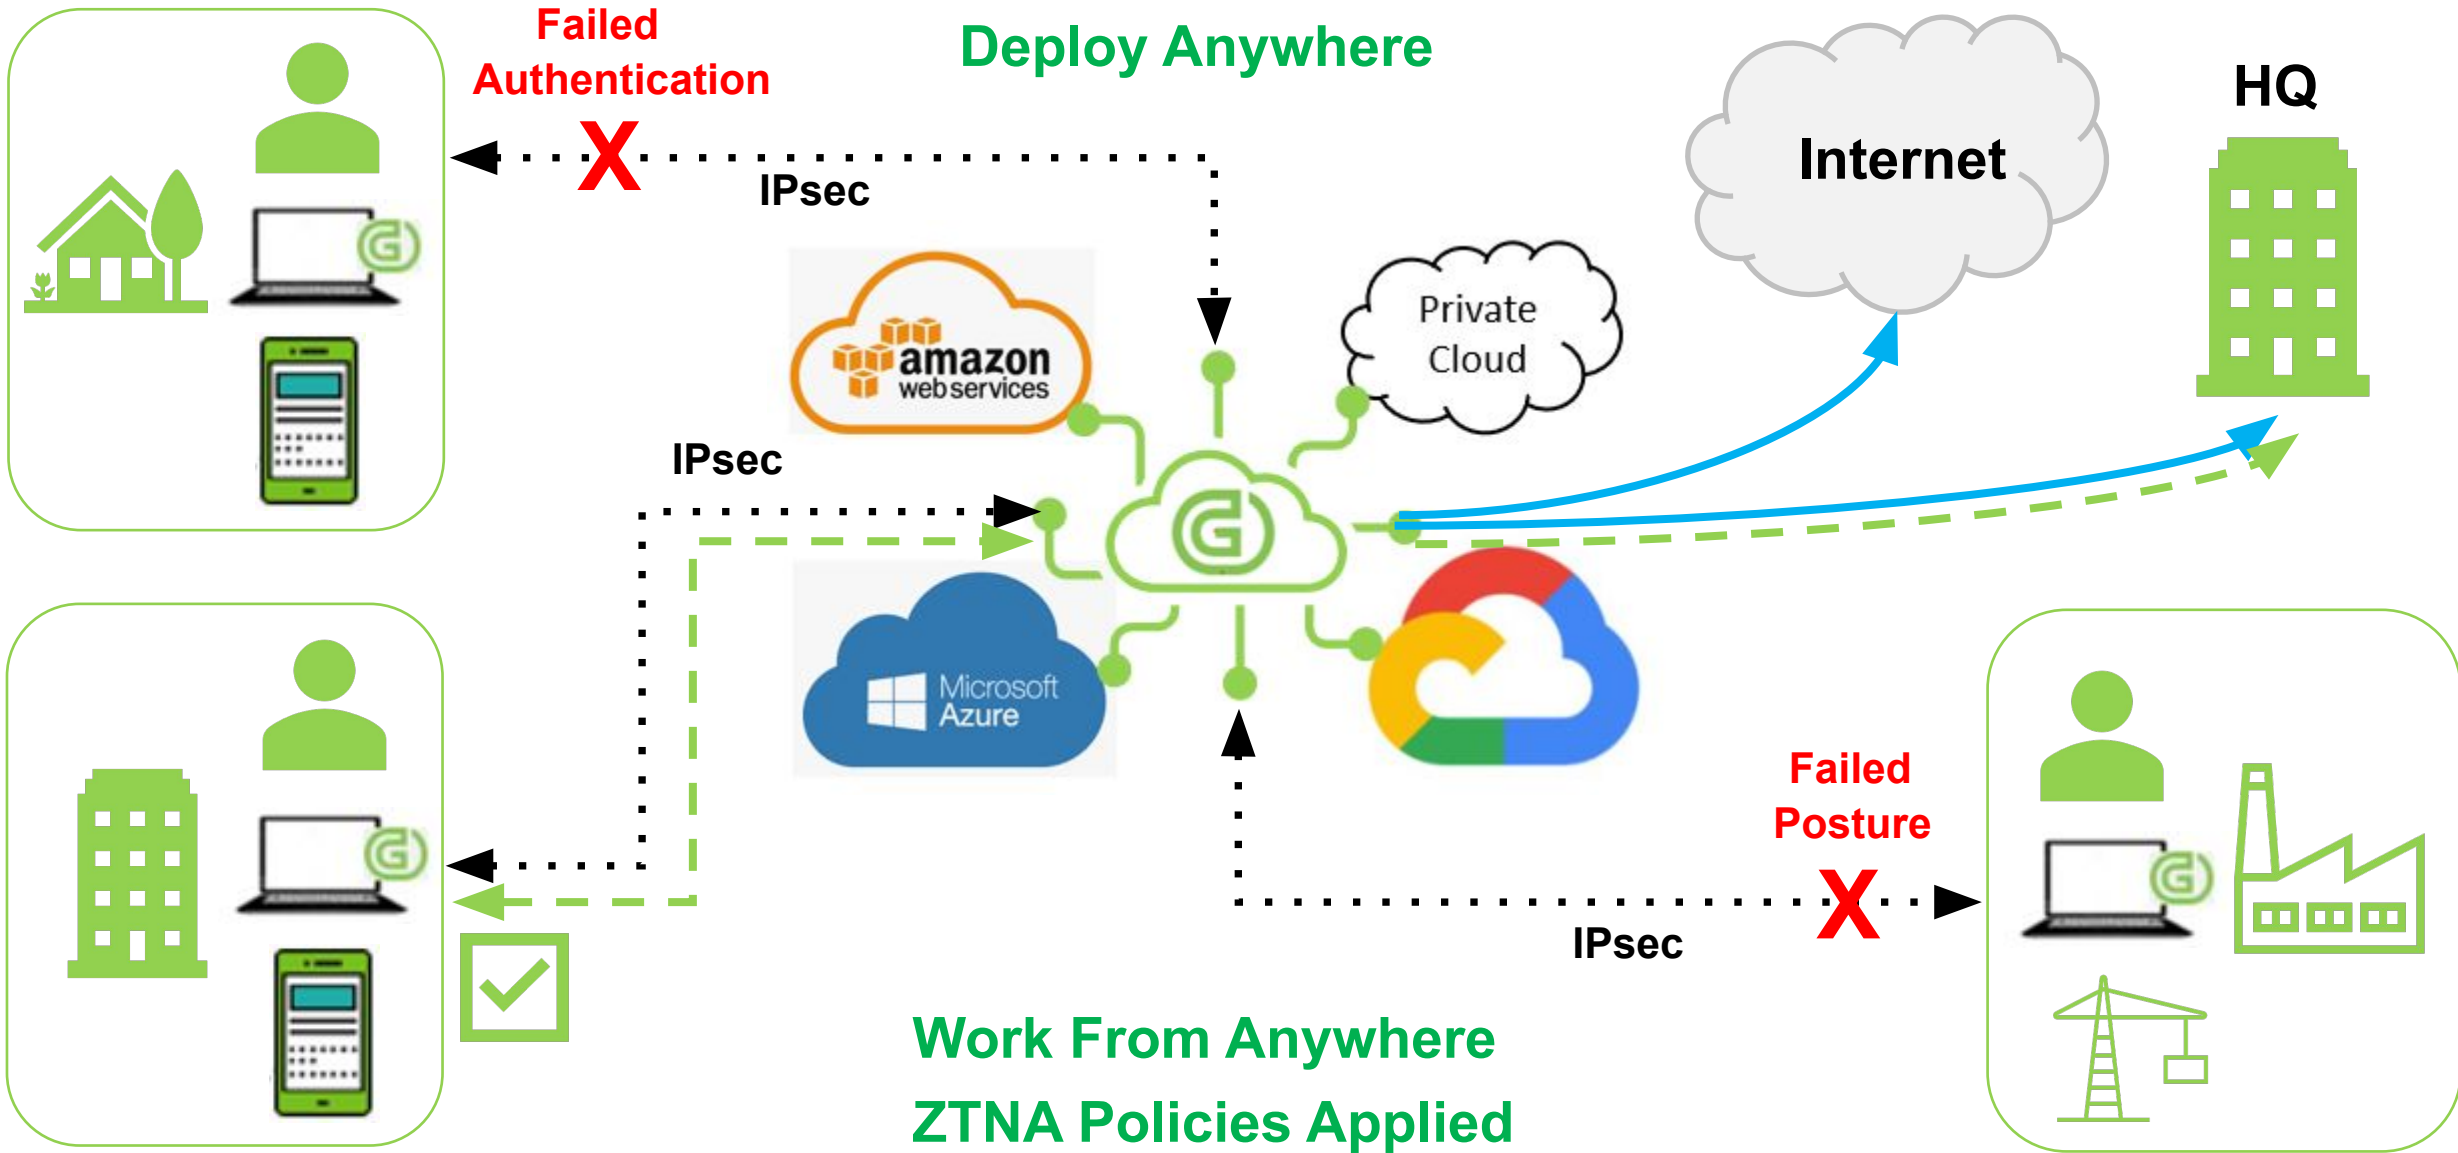

**Step 1**  
Cloud Node Matches  
on Enforcement Policy

**Step 2**  
Install Agent on Google  
Compute Instance

**Step 3**  
Agent Modifies Firewall Rules to  
Restrict or Quarantine Instance
